

SAKTHIVEL R

Java Developer · Full-Stack Engineer · Backend Developer

sakthivelr1679@gmail.com | +91-8015801133 | Tamil Nadu, India | Open to Relocate | github.com/Sakthi-1679 | linkedin.com/in/sakthivel-r72a15232

PROFESSIONAL SUMMARY

Results-driven **Java Developer** (CGPA 7.9/10) with end-to-end expertise in designing, building, and deploying production-grade Java applications and REST APIs. Proficient in **Core Java, Spring Boot, Microservices, JDBC**, and full-stack web development (HTML5/CSS3, JavaScript). Independently engineered two AI/ML applications — an NLP classification pipeline and a CNN-based deep learning model — each achieving **95%+ accuracy**. National hackathon finalist at **I4C New Delhi** and **Odoo 2025**. Strong command of SOLID principles, design patterns, MySQL, Git, and Agile methodologies.

TECHNICAL SKILLS

Programming Languages	Java (Primary) · Python · SQL · JavaScript
Java / Backend	Core Java · Spring Boot · REST APIs · Microservices · JDBC
Design & Architecture	SOLID Principles · Design Patterns · OOP · MVC
Frontend	HTML5 · CSS3 · JavaScript
Databases	MySQL · Oracle SQL · Data Modeling
ML / AI (Supporting)	TensorFlow · Keras · scikit-learn · CNN · NLP · OpenCV
Tools & Platforms	Git · GitHub · Maven · IntelliJ IDEA · VS Code · Linux · Agile
AI Frontiers	Generative AI · Large Language Models (LLMs)

KEY PROJECTS

Cyber Crime Report Classification System

I4C National Hackathon, New Delhi · 2025

Tech Stack: Java · Spring Boot · Python · NLP · TF-IDF · scikit-learn · REST APIs · MySQL

- Engineered an enterprise-grade **NLP text classification pipeline** with full ML lifecycle: data ingestion, preprocessing, tokenisation, TF-IDF feature engineering, multi-class model training and evaluation — achieving **95%+ classification accuracy**.
- Reduced manual law enforcement triage workload by **~60%** through automated AI-powered report categorisation, demonstrating measurable operational impact at national scale.
- Deployed model inference as a production **Spring Boot REST API** endpoint; presented working prototype to cybersecurity and government AI stakeholders at **I4C / MHA, New Delhi** under national competition conditions.

Emotion-Based Movie Recommendation System

2026

Tech Stack: Java · Spring Boot · Python · TensorFlow · Keras · OpenCV · CNN · Flask · MySQL

- Designed and delivered a product-grade end-to-end AI workflow: **CNN deep learning model** (TensorFlow/Keras) achieving **95%+ facial emotion recognition accuracy** with real-time OpenCV inference pipeline.
- Built modular **Spring Boot REST API** backend with clear separation of concerns across ETL pipeline, ML model layer, and **MySQL-backed recommendation engine** storing user profiles, watch history, and recommendation metadata.
- Implemented scalable recommendation logic integrating emotion classification outputs with user data, demonstrating full **Java full-stack lifecycle competency** from raw data through live AI-powered product deployment.

EDUCATION & TRAINING

EDUCATION

B.E. Computer Science & Engineering

PT Lee Chengalvaraya Naicker College of Engineering & Technology
2022 – 2026 | CGPA: **7.9 / 10.0**

TRAINING

Java Full-Stack Web Development Trainee

QSpiders, Chennai
2026 – Present

Core Java · Spring Boot · REST API · MySQL · JDBC · HTML5/CSS3 · JavaScript · Git · Agile · SOLID Principles · Design Patterns

ACHIEVEMENTS & CERTIFICATIONS

Achievements

- National Finalist — Odoo Hackathon 2025:** Designed & shipped a full-stack Java/AI platform within 48 hours under competition conditions.
- Round 2 Qualifier — Cyber Guard AI Hackathon, I4C / MHA, New Delhi (2025):** Shortlisted from national applicant pool.
- 95%+ Model Accuracy** achieved independently across two separate AI/ML projects.

Certifications

- Crash Course on Python** — Google / Coursera
- Generative AI with LLMs** — DeepLearning.AI / Coursera (*In Progress*)
